PROFILE

Computer Science graduate with strong foundations in Python, Machine Learning, and Web Development. Skilled in developing scalable applications, data analysis, and problem-solving. Eager to contribute to organizational success by applying technical expertise, collaborating in team environments, and continuously learning emerging technologies.

EDUCATION

B. E. Computer Science Engineering (Honours – AI & ML)

Vivekanandha College of Engineering for Women -- 2021 – 2025

CGPA – 8.5

TECHNICAL SKILLS

- **Languages:** Python, C, SQL
- **Libraries:** NumPy, Pandas, Matplotlib
- **Technologies:** HTML, CSS, PHP
- **Tools:** Git, VS Code
- **Concepts:** Machine Learning, Deep Learning, Artificial Intelligence, Data Structures & Algorithms

INTERNSHIP EXPERIENCE

Python with AI & ML Intern – NSIC (Govt. of India), Chennai

June 2024 – July 2024

- Gained hands-on experience in machine learning model development and data analysis
- Worked on real-time datasets to perform data cleaning, visualization, and insights generation
- Implemented ML concepts including classification and predictive analysis
- Improved coding efficiency by 20% through structured Python practices

PROJECT

VPN Network Traffic Detection using AI & ML

- Developed an AI- based system to detect and classify VPN traffic using pattern recognition techniques
- Processed and analyzed large- scale network datasets (1000 + records) to identify anomalies
- Improved detection capability by applying data preprocessing and feature extraction techniques
- Achieved high classification accuracy through ML model optimization

Hostel Management System

- Built a responsive web- based system using HTML, CSS, and PHP
- Designed database interaction workflows to manage hostel data efficiently
- Improved data accessibility and reduced manual record handling
- Delivered a user- friendly interface, enhancing usability and navigation

Smart Healthcare Assistant

- Developed an AI- powered healthcare chatbot to predict diseases based on user- input symptoms
- Integrated Groq API to enable real- time conversational responses, improving user interaction efficiency
- Implemented BMI calculation module to provide personalized health insights and recommendations
- Built a hospital locator feature to help users identify nearby healthcare facilities quickly

ACHIEVEMENT

Ascent Award Winner - Design Spark Challenge

- Honored for exceptional performance in a 50 - hour continuous challenge hosted by the School of Design Thinking & Intellect from March 7, 2025 to March 9, 2025.
- Received a healthcare- related problem statement on- spot and utilized design thinking principles to create a website within 50 hours using HTML, CSS, and PHP.

CERTIFICATION

- Introduction to Generative AI (Google Badge)
- Python with AI & ML Internship Certification – NSIC
